# Gayan Bamunusinghe

**Full-Stack Software Engineer**

gayanpoornima@gmail.com | +94 76 640 9484 | Wellampitiya, Sri Lanka | LinkedIn

An adept Full Stack Developer with nearly 3 years of industry experience. Recognized for solving complex problems and developing innovative web applications that align with business needs. Proven track record of crafting resilient solutions. Thrives in collaborative environments and welcomes new challenges.

## SKILLS

**Frontend:** Angular, React JS, HTML, CSS, Bootstrap, Kendo UI, Material UI
**Backend:** Node.js, .NET, .NET Core, NestJS, TypeORM, Express JS, Koa.js, Kafka, Redis, BullMQ, Federation, GraphQl, SAP Integration
**Databases:** PostgreSQL, MongoDB, MySQL, MSSQL, HANA, Firebase
**Cloud:** Azure DevOps, Docker, Git
**Testing & Tools:** Postman, Grafana, Fiddler
**Architecture & Best Practices:** Monolithic**,** Microservices, Event-Driven, Clean, Kafka, GraphQL, REST, Caching, Agile Practices

## WORK EXPERIENCE

**Software Engineer** | John Keels IT (Outsourced to Fortude) | *January 2025 – Present*

- **Identified and resolved** a critical SDK issue involving Angular lifecycle hooks, where the Ironhide M3 user ID was unintentionally cleared upon closing and reopening the SDK.
- **Developed and implemented** an audit trail system using Kafka events to track and monitor activities during purchase order transactions.
- **Identified and resolved** a critical software development kit (SDK) issue in reports related to cashing reset while scrolling to upper pages & implement toggling feature for reports.
- **Optimised** the Kafka event sequencer service by segmenting large datasets into smaller chunks, enabling more efficient and scalable processing.
- **Reviewed** Grafana logs to diagnose and resolve both the WebSocket configuration issue and the Email service configuration problem in UAT.

**Associate Software Engineer |** Pristine Solutions (Pvt.) Ltd | *July 2022 – December 2024*

- **Led the development and delivery** of Service Module Application V2, which utilised .NET and Angular frameworks, adhering to the principles of clean architecture**.**
- **Designed and implemented** reports for SFA (Salesforce Automation) using Angular, .NET, SAP, and optimised loading times to meet client requirements.
- **Enhanced API performance by 20%** by optimising stored procedures, indexing tables, and reducing data retrieval time to enhance scalability.
- **Collaborated with clients,** gathering and analyzing business requirements in an Agile environment to ensure a deep understanding of needs and delivering optimized solutions with iterative improvements
- **Led the migration** of an UAT database to a live environment and actively participated in resolving live issues to stabilise the system.
- **Developed and implemented the** JWT token system for Service Module Application V1, thereby enhancing the security of the system.

**Trainee Software Engineer** | Pristine Solutions (Pvt.) Ltd | *July 2022 – November 2022*

- **Developed and deployed** the service module application without senior resources and inadequate documentation. The application was developed using React, Nest.js, MySQL, and integrated with SAP**.**

## EDUCATION

**MSc (Reading) In Computer Science** | University of Kelaniya | 2025
**BSc (Hons.) in Information Technology Specialized in Software Engineering |** SLIIT |2024| Second class
**Diploma in Computer System Design** | NIBM | 2019 | 3.34 GPA
**G.C.E Advanced Level |** Ananda College | 2016 | Physical Scheme
